# Sign Up/Registration

Download GateGPS APP on your mobile phone and sign up.

Log in with the newly created username.

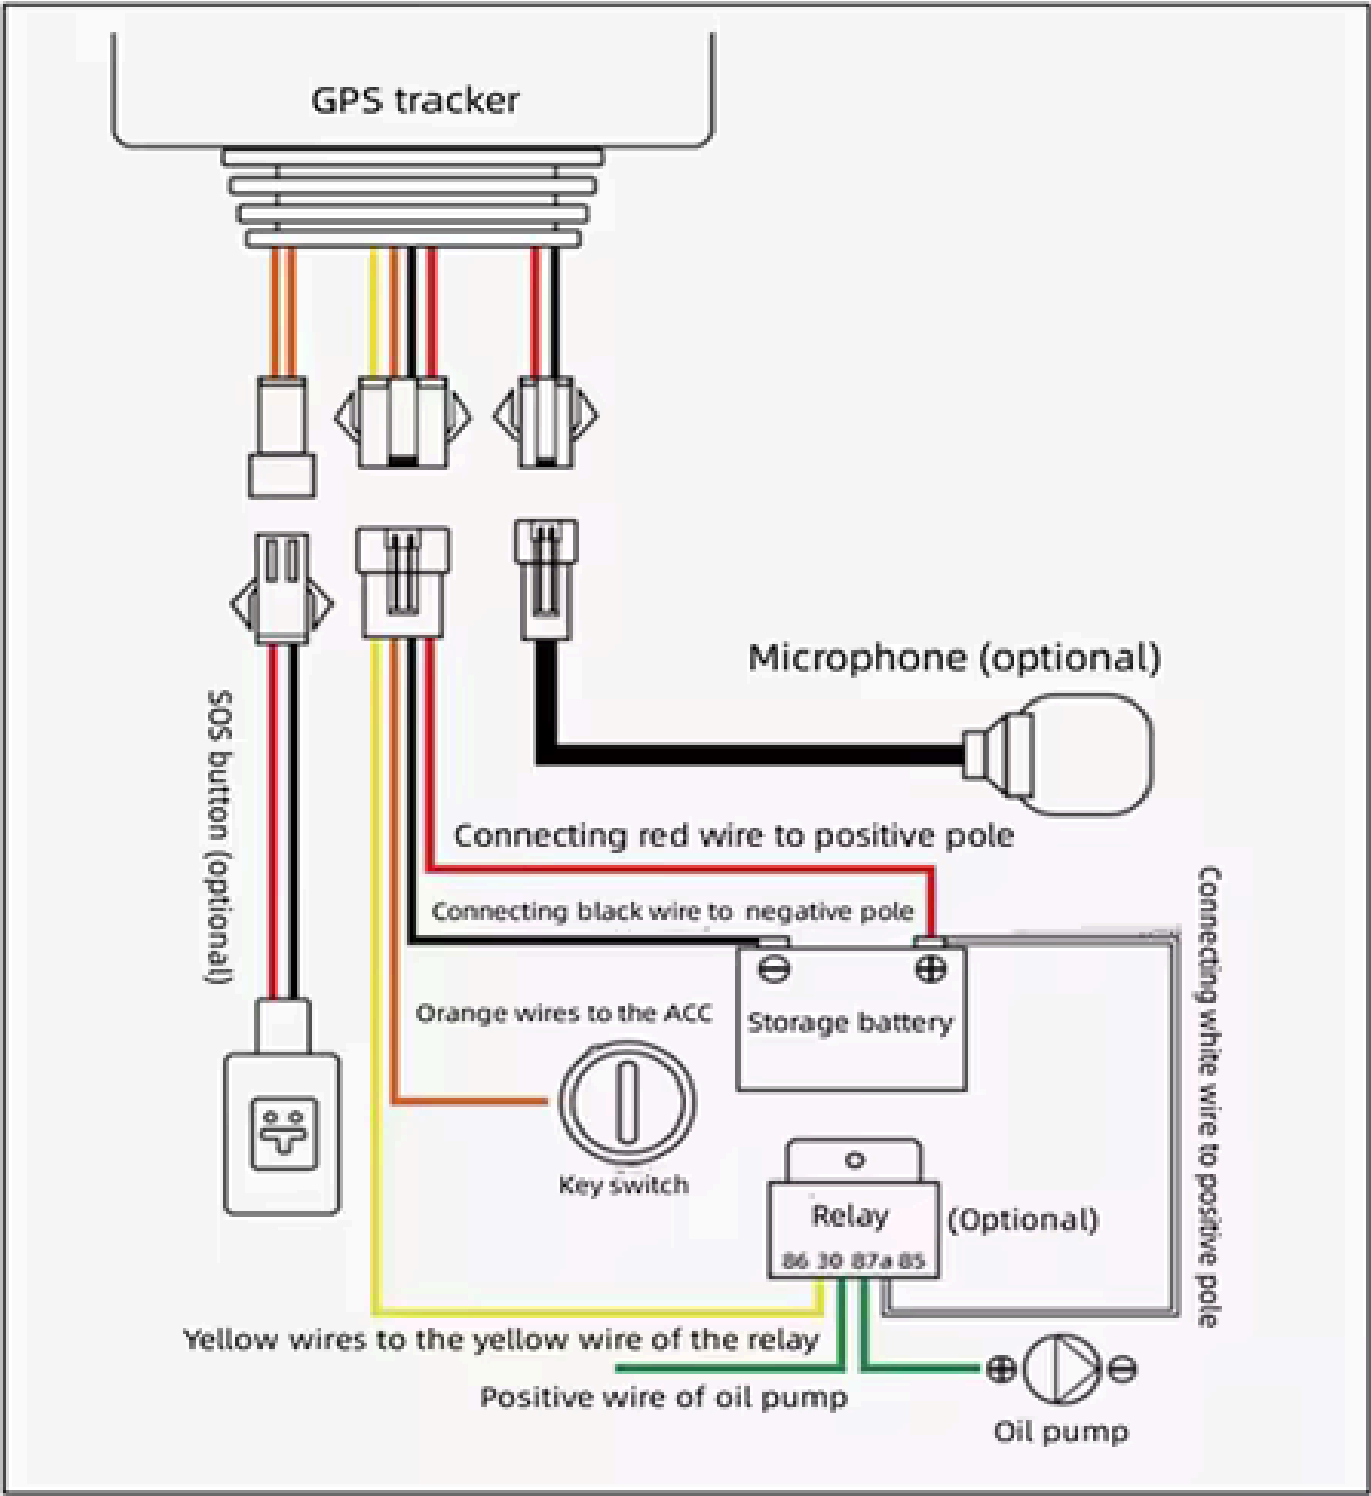

If user already has an account, just log in with existing account details.

Please note that the actual image might be different. Do not worry, it still has the same function.

# Product Parameters

- Size: 75 mm x 30 mm x 13 mm
- Weight: 35g
- Battery life: 06-24hours
- GPS sensitivity: Tracking: -165 dBm
- Position accuracy: 5 m
- Working voltage: 9-90 V
- GSM: 850/900/1800/1900 Quad band
- GPRS: Class12, TCP/IP
- Working current: 22 mA (DC12 V), 12 mA (DC24 V)
- GPS locating time: Cold start 32 seconds (open sky)

# Wiring Diagram

## Installation Steps

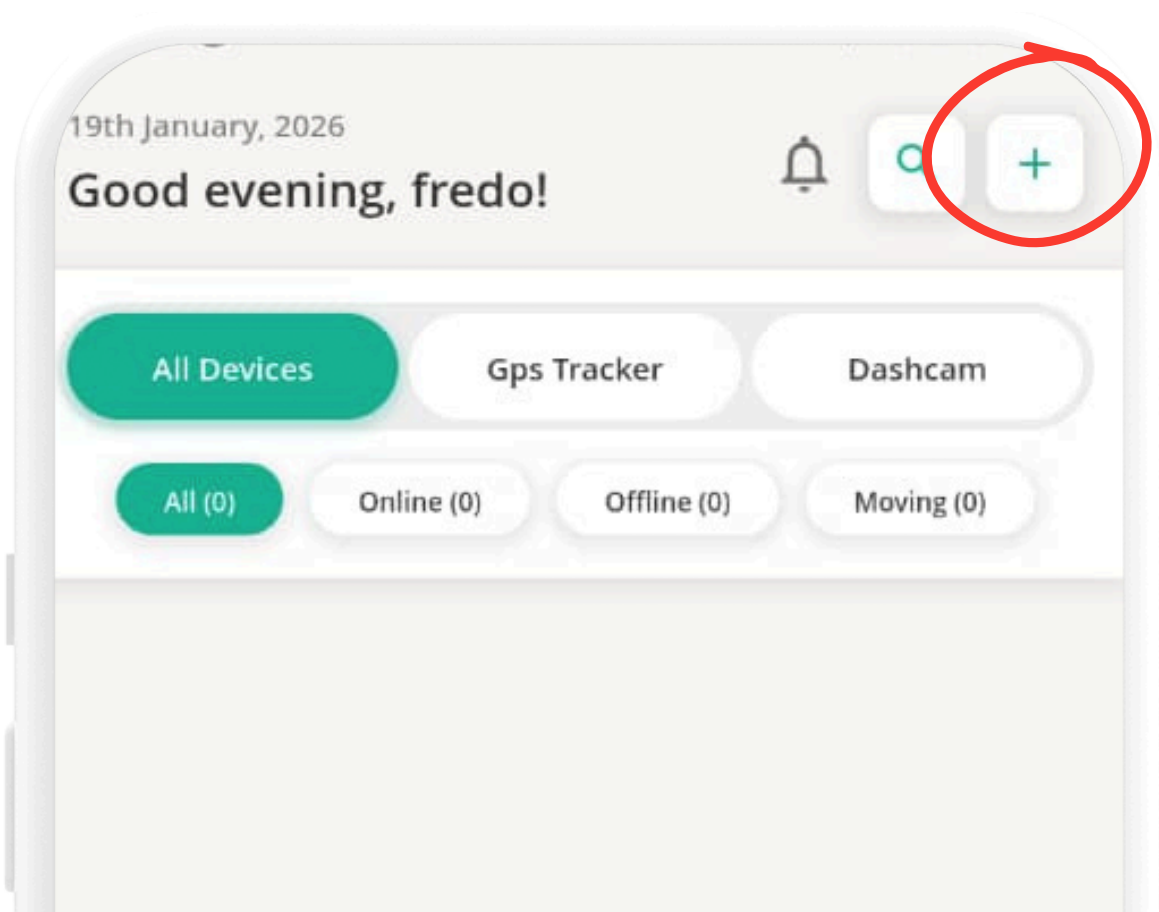

- Using the cable provided in the box with this terminal, make connections as shown in the wiring diagram.
- Ensure the ACC wire (Orange wire) is connected for proper and timely functioning on APP.
- Insert a valid SIM card in the device.
- Switch on the device with the pin included in the box.
- Plug the device to the socket.
- Hide in a good location in the vehicle. (*Away from extreme temperature, dust and moisture*).

By default, the mini-relay is provided with this terminal. Feel free to change with any 4pin relay 12v/24v relay of choice. GG Devices are compactible with a wide range of relays
